PHYSICS AND ASTROPHYSICS MASTERS:
Research opportunities in the Phys. Dept.

Venue: MONDAY SEPTEMBER 30, 2pm, AULA AMALDI

2pm - Dott. Libutti: Come accedere alle riviste scientifiche della biblioteca (in Italian)
2.20pm - R. Schneider: From the cosmic microwave radiation to the hunt for exoplanets: a cosmic journey through the research activities in astrophysics
2.50pm - P. Pani: Gravity theory and gravitational-wave phenomenology
3:10pm - P. Mataloni: Quantum information experiments with photons at Sapienza
3:20pm - C. Mariani: New atomic/molecular architectures, from soft matter to nanoscience: Experimental condensed matter physics at Sapienza
3:35pm - M. Grilli: Hard and soft condensed matter theories and their spinoffs
4:00pm - G. Ruocco: Physics of soft and biological matter
4:20pm - E. Marinari: Statistical physics and complexity
4:40pm - R. Bonciani: Theoretical high-energy physics at Sapienza
4:50pm - L. Soffi: Opportunities in particle and medical physics
5:05pm - I. Di Palma: Astroparticle physics in the multimessenger era at Sapienza
